**Reference:** Urgent information on alleged human rights violations to OHCHR special Procedures and Request for Immediate International Intervention in the Miskitu Autonomous Regions of Central America

As the Matriarch of our most beloved Miskitu Peoples, I come before the International Community once again by providing urgent information and indisputable proof of horrific human rights violations and the torment of torture and genocide against my peoples by the Nicaraguan Colonos (Colonists) who have been sent into our autonomous territories by the Sandinista government of José Daniel Ortega Saavedra and his wife Rosario María Murillo Zambrana for the purpose of seizing our homes, farms, natural resources and forests at the expense of liquidating and torturing our people in our entirety for the purpose of atrocities that constitute genocide and torture.

It has been with a heavy heart that my pleas before the United Nations and OAS have been ignored and our suffering met with international silence. Our Peoples cannot tolerate nor endure the atrocities and horrific suffering and trauma that I am about to present to you as representatives of the international tribunals on human rights. We are now pleading from the depths of our hearts for your ears to listen and see our sufferings that we now are able to present undeniable evidence before you.

It is at this specific time in our present day that as my Peoples' representative, I provide proof of these atrocities with my appeal to your international tribunals requesting immediate intervention, peacekeepers, Special Rapporteur, and independent experts sent into our autonomous regions to help restore the Peace and end hostilities.

### THE KING'S HOUSE

At this same time, I am commanding the Elders of each and every one of our Miskitu communities and villages to come together, gather volunteers for the purpose of assembling local militias bearing arms, in the preparation for the defense of our Peoples by whatever means available under the conditions of the **political doctrine of *jus ad bellum***.

If my people are going to be mutilated and killed, let their sacrifices and deaths be In defense of our nation and tribes for the protection of our families and peoples and we will die as fighters for our rights to exist as free and safe Miskito peoples.

In the defense of the very survival of our Miskitu nation, it is my request for the international community to provide to our local Miskitu militias, any military provisions and weapons, without delay to assure the protection and safety of our Peoples.

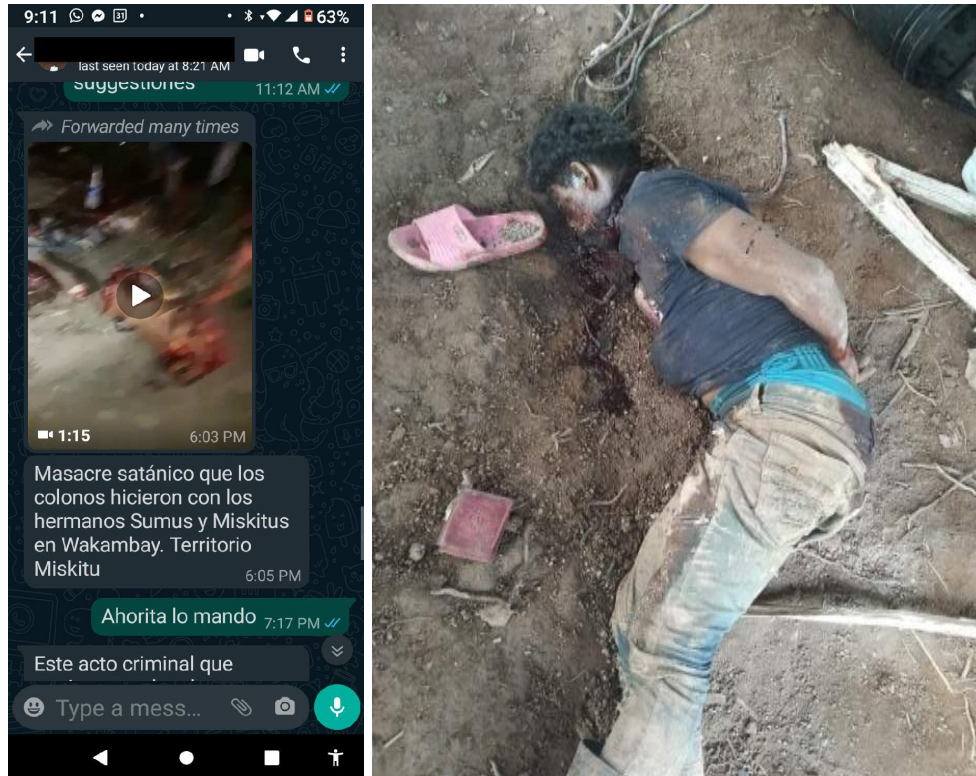

As we prepare our People for the defense of our national and autonomous territories, we request an immediate response and wait for the international decisions for intervention without any further delay.

As the Matriarch of my People, I was provided the following information and video to present on their behalf to the International community in support of my request for intervention. These are their details regarding the disturbing video evidence that is attached:
